Becoming a Learning School

Becoming a Learning School is a two-day learning experience that focuses on developing a school's capacity to implement NSDC's definition of professional learning and a model of continuous improvement that emphasizes teacher collaborative learning as a significant vehicle for improving teaching quality and student learning.

Participants will learn how to:

- Identify the core elements of a learning school that engages in collaborative professional learning;
 - Develop strategies for transforming your school into a learning school;
 - Acquire tools to assess your school's progress toward becoming a learning school;
- Clarify roles of the stakeholders in a learning school; and
 - Troubleshoot issues that are perceived as barriers to collaborative professional learning.

Attend this Institute to:

- Strengthen school and district culture to focus on educator and student learning;
- Initiate, refine, or expand the use of collaborative professional learning within your school;
- Explore ways to evaluate the effectiveness of collaboration within your schools; and
- Develop leaders within your schools to facilitate the transition to a learning school.

Choose to attend in exhilarating Toronto or festive Calgary. Your \$399 registration fee includes breakfast and lunch for two days, and a copy of *Becoming a Learning School*. Save \$25 when you register by March 15, 2010. NSDC members get extra savings—an additional \$50 discount! Not a member? Join today and take advantage of the \$50 member discount.
